

Isis Subtitle File Viewer

Isis File Viewer is a Windows software application for viewing the content, and previewing the on-screen positioning, of an industry standard closed caption file. The application also includes a comprehensive file Quality Check utility.

It will prove useful to anyone involved with the creation, editing or processing of closed caption and subtitle files for broadcast, DVD or web delivery.

Key features

- Supports .stl, .pac and .srt files
- Displays the full EBU Header block information
- Displays selected caption text and a rendered preview with correct justification
- Display option to show raw hex Teletext data
- Option to view the control characters on the rendered view

File QC includes

- Extensive checks on the validity of header block information
- Check that Max displayable characters per row is valid
- Check that caption In Time \geq overall In Time
- Check that caption Out Time \leq overall Out Time
- Check that next caption In Time \geq current caption time (overlapping caption)
- Check that next caption overall In Time \geq current overall out time
- Programmable 'House Style' checks
 - Caption duration \geq Minimum duration
 - Caption duration \leq Maximum duration

PC requirements
