

FILE CHECKS FOR PAC SUBTITLE FILES

One of the file format options used with the subtitle file QC service

Header Checks - Subtitle 0

- Check STORY tag matches filename
- Check LANG is Valid 3 character code and matches filename

Check Data Block Sequence

- Check for empty file (no subtitles) - raise warning
- Verify subtitle number sequence
-

Check Individual Data Blocks

- Verify that timecodes are valid numbers (not spaces, letters, etc.)
- Check that out timecode is greater than in timecode (raise warning if they are equal)
- If minimum duration is set check that $T_{out} - T_{in} \geq MinDuration$
- If maximum duration is set check that $T_{out} - T_{in} < MaxDuration$

All specifications and minimum requirements are subject to change without prior notice. Please check before purchase.
