### **Turkish Delight at Starfish Subtitling**

#### ***Dogan TV choose Starfish DVB subtitling for features and flexibility***

Reading, UK, April 2...Starfish Technologies has supplied Dogan TV, part of the largest commercial broadcaster in Turkey, with a multi-channel DVB subtitling system for its main transmission centre in Istanbul. The sale includes a number of Starfish TransCast DVB subtitle transmission systems and Isis subtitle authoring software.

Commenting on the new installation, Onur Mesta, Digital Platform Head-end Manager at Dogan TV said 'We have extremely demanding DVB requirements that could only be met by the features and flexibility of the Starfish TransCast system. This was a crucial factor in our decision alongside the ease of use offered by the ISIS subtitling software.'

Peter Blatchford, Director of Sales and Marketing at Starfish added 'It's always gratifying to receive this type of endorsement from a major transmission provider, especially after such a lengthy and rigorous selection process.'

The multi-channel subtitling service at Dogan TV is due to go live in April with three movie channels and one subscription-based channel devoted to education.

The sale to Dogan was managed by Computorium, Starfish Technologies' Turkish reseller.

ENDS
